NAME

curl_formfree - free a previously build multipart/formdata HTTP POST chain

SYNOPSIS

#include <curl/curl.h>

void curl_formfree(struct curl_httppost * form);

DESCRIPTION

curl_formfree() is used to clean up data previously built/appended with *curl_formadd(3)*. This must be called when the data has been used, which typically means after the *curl_easy_perform(3)* has been called.

RETURN VALUE

None
